PROFILE

Teleinformatics specialist with hands-on experience in building and deploying scalable IT infrastructure. Passionate about homelabbing, automation, and continuous integration. Proven track record of bridging the gap between software development and IT operations using tools like Kubernetes, Terraform, and Jenkins. Enthusiast of open-source technologies, climbing, and retro gaming.

EXPERIENCE

Working Student (DevOps / Software Engineer)

2026 – Present

Nokia Solutions and Networks

Wrocław, Remote

- Developed full-stack features and optimized system performance using Flask (Python) and ReactJS
- Configured DevOps pipelines and monitoring using Jenkins jobs, Ansible playbooks, and Grafana dashboards with Prometheus data
- Integrated AI into workflow using Cursor, GitHub Copilot, and custom agent rules
- Conducted code reviews prior to deployment and managed version control with Gerrit and GitLab

Sales expert/Brand ambassador

Feb. 2025 – Jan. 2026

Lenovo (SalesUP Polska)

- Sales and presentation of Lenovo products and customer communication
- Implementing promotional materials on the shop floor and inventory management

Data scraper

Mar. 2023 – May 2023

SEOmood

- Developed JavaScript scripts to collect and process data from websites (web scraping & automation)
- Implemented improvements and bug fixes in existing codebase
- Modernized and optimized legacy code for better performance and readability

PROJECTS & ADDITIONAL ACTIVITIES

Homelab Infrastructure | *Proxmox, Terraform, Ansible, k3s* | [GitHub](#)

- Provisioned Proxmox VMs for a k3s cluster (1 master, 2 workers) and LXC containers using Terraform (bpg/proxmox) and Ansible
- Deployed a personal portfolio on k3s utilizing Docker Hub and GitHub Actions for CI/CD
- Secured external access via Cloudflare Tunnel to a ClusterIP Service (fwojno.com), eliminating open router ports

Arcade Console for Retro Games | *ESP32, C, 3D print, AutoCAD*

- Co-designed and built an arcade console for retro gaming as part of "Apacz500" research group
- Integrated Raspberry Pi running RetroPie with Bluetooth controllers powered by ESP32 microcontrollers

Web Application for Vulnerability Scanning | *Python, FastAPI, React, PostgreSQL* | [GitHub](#)

- Developed a web app that scans websites for vulnerabilities like SQL Injection, XSS, and open ports

EDUCATION

West Pomeranian University of Technology

Szczecin, Poland

Bachelor of Engineering in Teleinformatics

2023 – 2027

SCI Computer Science High School

Szczecin, Poland

IT technician - computer engineering

2019 – 2023

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, SQL, C#

Frameworks & Libraries: ReactJS, Next.js, FastAPI, Flask, TailwindCSS, Swagger, Playwright, Puppeteer

DevOps & Cloud: Linux, Docker, Kubernetes, k3s, Proxmox, Terraform, Ansible, Jenkins, Cloudflare Tunnel, GitHub Actions

Monitoring & Tools: Grafana, Prometheus, Git/GitHub, GitLab, Gerrit, Jira, Postman

Databases: PostgreSQL, MongoDB, Redis, ClickHouse, SQLite

Hardware: Raspberry Pi, ESP32, FPGA, ATmega256
